ANALYTICA CHIMICA ACTA

An international journal devoted to all branches of analytical chemistry

CONTENTS DIRECT

(Full texts are incorporated in CJELSEVIER, a file in the Chemical Journals Online database available on STN International; Abstracted, indexed in: Aluminium Abstracts; Anal. Abstr.; Biol. Abstr.; BIOSIS; Chem. Abstr.; Curr. Contents Phys. Chem. Earth Sci.; Engineered Materials Abstracts; Excerpta Medica; Index Med.; Life Sci.; Mass Spectrum. Bull.; Material Business Alerts; Metals Abstracts; Sci. Citation Index)

VOL. 348 NO.1–3 CONTENTS AUGUST 20, 1997

Papers presented at the International Conference on Chemometrics in Analytical Chemistry; Tarragona, Spain, 25–29 June, 1996

Publisher's Note xi

Preface xiii

Calibration

Calibration method choice by comparison of model basis functions to the theoretical instrumental response function
K.S. Booksh (Temple, AZ, USA) and B.R. Kowalski (Seattle, WA, USA) 1

Performance of the orthogonal least median squares regression
L.A. Sarabia, M.C. Ortiz (Burgos, Spain) and X. Tomás (Barcelona, Spain) 11

Evaluation of principal component selection methods to form a global prediction model by principal component regression
Y.-L. Xie and J.H. Kalivas (Pocatello, ID, USA) 19

Local prediction models by principal component regression
Y.-L. Xie and J.H. Kalivas (Pocatello, ID, USA) 29

Evaluation and elimination of the blank bias error using the H-point standard additions method (HPSAM) in the simultaneous spectrophotometric determination of two analytes
P. Campíns-Falcó, J. Verdú-Andrés and F. Bosch-Reig (València, Spain) 39

Multivariate calibration transfer applied to the routine polarographic determination of copper, lead, cadmium and zinc
A. Herrero and M.C. Ortiz (Burgos, Spain) 51

Controlling uncertainty in calibration
W. Bremser and W. Hässelbarth (Berlin, Germany) 61

Genetic algorithms as a method for variable selection in multiple linear regression and partial least squares regression, with applications to pyrolysis mass spectrometry
D. Broadhurst, R. Goodacre, A. Jones, J.J. Rowland and D.B. Kell (Aberystwyth, UK) 71

Linear and non-linear multivariate analysis in the quality control of industrial titanium dioxide white pigment
N. Majcen (Celje, Slovenia), F.X. Rius (Tarragona, Spain) and J. Zupan (Ljubljana, Slovenia) 87

Flow Analysis Applications

Simultaneous determination of iron(II) and iron(III) by flow injection analysis. A mathematical simulation of the detector response
M. Novič, M. Novič, J. Zupan, N. Zafran and B. Pihlar (Ljubljana, Slovenia) 101

On-line automated analytical signal diagnosis in sequential injection analysis systems using artificial neural networks
I. Ruisánchez, J. Lozano, M.S. Larrechi, F.X. Rius (Tarragona, Spain) and J. Zupan (Ljubljana, Slovenia) 113

Quality compromises incorporated in simplex optimisation of a flow injection system
E. Vereda (Málaga, Spain), A. Ríos and M. Valcárcel (Córdoba, Spain) 129

Computational neural networks for the evaluation of biosensor FIA measurements
B. Hitzmann, A. Ritzka, R. Ulber, T. Scheper and K. Schügerl (Hannover, Germany) 135

Evaluation of natural computation techniques in the modelling and optimization of a sequential injection flow system for colorimetric iron(III) determination
J. de Gracia (Bellaterra, Spain), M.L.M.F.S. Saravia, A.N. Araújo, J.L.F.C. Lima (Porto, Portugal), M. del Valle (Bellaterra, Spain) and M. Poch (Girona, Spain) 143

Use of pH gradients in continuous-flow systems and multivariate regression techniques applied to the determination of methionine and cysteine in pharmaceuticals
F. Blasco, M.J. Medina-Hernández and S. Sagrado (Valencia, Spain) 151

(Continued overleaf)

A new evaluation technique for FIA measurements: projective reference evaluation
B. Hitzmann, A. Löhn, M. Arndt, R. Ulber and C. Müller (Hannover, Germany) 161
Figures of merit in multivariate calibration. Determination of four pesticides in water by flow injection analysis and spectrophotometric detection
J. Ferré, R. Boqué, B. Fernández-Band, M.S. Larrechi and F.X. Rius (Tarragona, Spain) 167

Chromatography Applications
Resolution of overlapping peaks in HPLC with diode array detection by application of partial least squares calibration to cross-sections of spectrochromatograms
M.D.G. García, A.G. Frenich, J.L.M. Vidal, M.M. Galera (Almería, Spain), A.M. de la Peña and F. Salinas (Badajoz, Spain) ... 177
Global treatment of chromatographic data with MICHROM
J.R. Torres-Lapasió, M.C. García-Alvarez-Coque and J.J. Baeza-Baeza (Valencia, Spain) 187
Use of spectral mapping technique for the separation of solvent strength and selectivity on β-cyclodextrin polymer-coated HPLC column using monoamine oxidase inhibitory drugs as solutes
T. Cserháti (Budapest, Hungary) 197
Analyzing time varying flow composition using multiple input chromatography
M. Kaljurand and M. Koel (Tallinn, Estonia) 203
Modelling of gas chromatographic retention indices using counterpropagation neural networks
M. Pompe, M. Razinger, M. Novič and M. Veber (Ljubljana, Slovenia) 215
Study of different criteria for the selection of a rugged optimum in high performance liquid chromatography optimisation
P.F. de Aguiar, Y.V. Heyden and D.L. Massart (Brussels, Belgium) 223

Optimization
Sequential response surface methodology for multioptimization in analytical chemistry with three-variable Doehlert designs
A.M.G. Campaña, L.C. Rodríguez, A.L. González, F.A. Barrero and M.R. Ceba (Granada, Spain) 237
Effects of parameters on microwave assisted extraction of triazines from soil: evaluation of an optimisation trajectory
R. Hoogerbrugge, C. Molins and R.A. Baumann (Bilthoven, Netherlands) 247

Spectroscopic Methods
Advantages of a hierarchical system of neural-networks for the interpretation of infrared spectra in structure determination
C. Cleva, C. Cachet, D. Cabrol-Bass (Nice, France) and T.P. Forrest (Nova Scotia, Canada) 255
Chemometric analysis of diffuse reflectance spectra of Co^{2+}-exchanged zeolites: spectroscopic fingerprinting of coordination environments
A.A. Verberckmoes, B.M. Weckhuysen, R.A. Schoonheydt, K. Ooms and I. Langhans (Heverlee, Belgium) 267
Diffuse reflectance absorbance spectroscopy taking in chemometrics (DRASTIC). A hyperspectral FT–IR-based approach to rapid screening for metabolite overproduction
M.K. Winson, R. Goodacre, É.M. Timmins, A. Jones, B.K. Alsberg, A.M. Woodward, J.J. Rowland and D.B. Kell (Ceredigion, UK) 273
Detection, interpretation and correction of changes in the instrumental response of near-infrared monochromator instruments over time
E. Bouveresse, S.C. Rutan, Y.V. Heyden, W. Penninckx and D.L. Massart (Brussels, Belgium) 283
Effective mass sampled by NIR fiber-optic reflectance probes in blending processes
J. Cho (Seoul, South Korea), P.J. Gemperline (Greenville, NC, USA), P.K. Aldridge and S.S. Sekulic (Groton, CT, USA) 303
Data analysis techniques for monitoring excited state kinetics
J.C. Fister III and J.M. Harris (Salt Lake City, UT, USA) 311
Computer-assisted IR spectra prediction — linked similarity searches for structures and spectra
K. Baumann and J.T. Clerc (Bern, Switzerland) 327
Spectroscopic prediction of nonlinear properties by principal component regression
I. Litani-Barzilai and I. Schechter (Haifa, Israel) 345

Pattern Recognition
Discrimination of the variety and region of origin of extra virgin olive oils using ^{13}C NMR and multivariate calibration with variable reduction
A.D. Shaw (Ceredigion, UK), A. di Camillo, G. Vlahov (Pescara, Italy), A. Jones (Ceredigion, UK), G. Bianchi (Pescara, Italy), J. Rowland and D.B. Kell (Ceredigion, UK) 357
Classification of single particles by neural networks based on the computer-controlled scanning electron microscopy data
P.K. Hopke and X.-H. Song (Potsdam, NY, USA) 375
Classification of pyrolysis mass spectra by fuzzy multivariate rule induction-comparison with regression, *K*-nearest neighbour, neural and decision-tree methods
B.K. Alsberg, R. Goodacre, J.J. Rowland and D.B. Kell (Ceredigion, UK) 389

Molecular Structure
General type of a uniform and reversible representation of chemical structures
J. Zupan and M. Novič (Ljubljana, Slovenia) 409
Data correlation, number of significant principal components and shape of molecules. The *K* correlation index
R. Todeschini (Milan, Italy) 419

(*Continued overleaf*)

Application of semiempirical method (AM1) to the study of tautomeric equilibria in the gas phase for simple compounds containing the amidine group: 4(5)-substituted imidazoles
E.D. Raczyńska (Warsaw, Poland) 431
Expert systems as a tool for the molecular structure elucidation by spectral methods. Strategies of solution to the problems
M.E. Elyashberg, Yu.Z. Karasev, E.R. Martirosian (Moscow, Russian Federation), H. Thiele (Bremen, Germany) and H. Somberg (Rheinstetten\Karlsruhe, Germany) 443
Automatic generation of hypermedia
C.L. Macher, A. Gloor and E. Pretsch (Zürich, Switzerland) 465

Quantitative Structure/Activity, Spectrum, Retention Relationships
Linear and non-linear modelling techniques for the investigation of spectrum-structure relationships
H.J. Luinge, M.H. Langoor and J.H. van der Mass (Utrecht, The Netherlands) 471
Use of cluster and principal component analysis in quantitative structure-retention relationship study
E. Forgács and T. Cserháti (Budapest, Hungary) 481
QSAR study of inclusion complexes of heterocyclic compounds with β-cyclodextrin
R. Carpignano, M. Marzona, E. Cattaneo and S. Quaranta (Torino, Italy) 489

Neural Networks
Linear data projection using a feedforward neural network
P. Cleij and R. Hoogerbrugge (Bilthoven, The Netherlands) 495
Neural network based electronic nose for the classification of aromatic species
J. Brezmes, B. Ferreras, E. Llobet, X. Vilanova and X. Correig (Tarragona, Spain) 503
On mass spectrometer instrument standardization and interlaboratory calibration transfer using neural networks
R. Goodacre, É.M. Timmins, A. Jones, D.B. Kell (Aberystwyth, UK), J. Maddock (Heathfield, UK), M.L. Heginbothom and J.T. Magee (Aberystwyth, UK) 511
GINN (Genetic Inside Neural Network): towards a non-parametric training
M.S. Sánchez and L.A. Sarabia (Burgos, Spain) 533

Tomography
Quantitative constituent measurements in scattering media from statistical analysis of photon time-of-flight distributions
L. Leonardi and D.H. Burns (Montreal, Canada) 543
Optical tomographic reconstruction from diffuse remittance in scattering media using partial least squares estimation
W.F. Long and D.H. Burns (Montréal, Canada) 553

Author Index 565
